Actor Bio:

I've been on an undying mission to fulfill my destiny. I knew early on that this is where I belonged. My Los Angeles love affair began at the age of fifteen, constantly coast hopping from Chicago, where I left my family behind. My heart is left with them, and with absolute love and support, accepted the calling of my soul, and am driven by the fire in my gut. Through this journey of personal hardship and family illness, I've learned of my inner strength to persevere; never to give up, for I answer to a higher calling.

Raised in a Romanian family with an American education, composed the constant contradictions I've experienced, truly on a day-to-day level. It uniquely molded my view of the world and society as a whole. I feel that it is my duty to return to my native country once I've reached my goals, and begin a new mission, as an American, to unite the powers that be, for the greater good of the people that suffer each and every day. We should all strive to enrich each others' lives by nurturing one another. Life is love.

I know that I am very dedicated, energetic, quick-witted and hard-working. My drive and ambition will gear me toward the necessary steps in advancing my status in this industry, and proving my worth by the reflection of my work.
